*The Keys

The
Pennant

Foreword

This is the story of how we have accumulated keys to add to our chain of success. Although it has taken us years to find these keys, we realize the search was not in vain, for they have opened doors we never want to close.

Our search for the keys to success has not ended here, however. We are looking toward the future in the anticipation that we shall continue to be as fortunate as we have been in the past in discovering these keys.

May our keys unlock many doors for the coming seniors, and assist them as they have us, in achieving their goals.

Dedication

MR. WILLIAM H. KAISER

The man who has helped us acquire our keys to success is Mr. William Kaiser. During his years at Penn-Bernville he has done a great deal toward the advancement of mathematics. Because of his able leadership and his willingness to extend a helping hand, Mr. Kaiser has won the respect and admiration of all the students in our school. It is, therefore, with deepest respect that we dedicate the 1960 PENNANT to Mr. William Kaiser, a credit to the teaching profession.

LEADERSHIP is the first key we will attach to our chain of success. We have learned that, to become successful, we must assume an active role in life and accept the challenge of responsibility. Our teachers have given us this key by serving as fine examples and by inspiring us to lead.

On behalf of the faculty and student body may we extend our sincere thanks to the class of 1960 and its advisors for the publication of this current edition of the PENNANT. We feel sure that this book will continue to carry forth the fine tradition established by the yearbooks of the past.

The theme of this year's book, "The Keys to Success," has real significance to all of us who are in school. If we can, through work in school, find the formula for success, then our later lives will be much more fruitful and worthwhile. We believe that our school life is a training ground for our later adult life and it truly is the storehouse for "The Keys to Success."

Best wishes to the class of 1960.

PERSEVERANCE is a key prerequisite to success in any undertaking, for, to do a job well, we must be patient and constant in our efforts. If we meet with failure in our attempts, we must be willing to attack the problems again, not succumb to our shortcomings.

The juniors used ladders, black cats, and broken mirrors to create an atmosphere of superstition for their "Night of Friday the 13th," dance in November. A more restful atmosphere greeted guests at their prom, which was based on a Hawaiian theme. Other highlights of the year were an assembly program, the class play, and purchase of class rings.

In a January assembly program the sophomores took the student body back to the "Gay Nineties" for a "Venture in Vaudeville." In March they transported imaginations to the gaiety and festivity of the Mardi Gras when using this theme for their dance decorations. The high spot of the year for this class was the purchase of blue and white class jackets.

Underclasses in Action

Curricula

SCHOLARSHIP is a major key, for it plays a crucial part in deciding between success or failure. Man must seek knowledge to better understand his environment; he must be constantly alert to new ideas without which he can only retrogress, not progress.

We are not satisfied with mediocrity, therefore we find this key an important one for our lives.

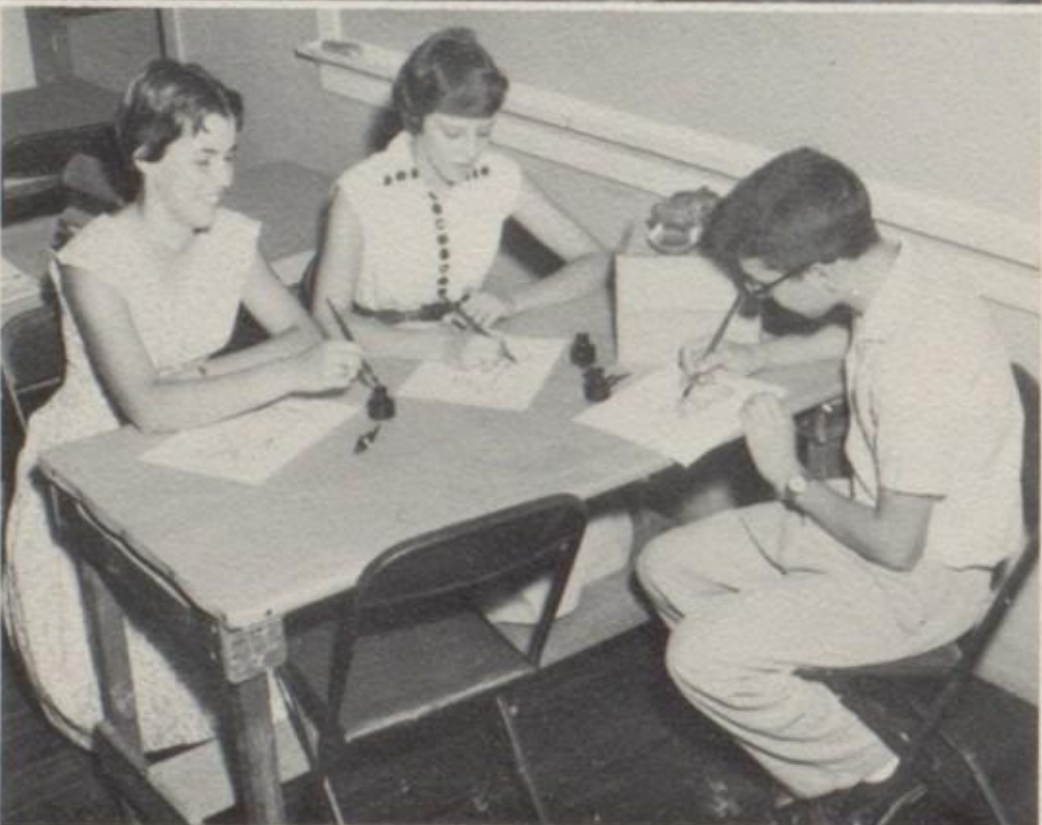

Agriculture

Irwin Zerbe, Arthur Kissling, and Bruce Good look at some of the latest editions of farm magazines. Members of the agriculture classes learn the latest and most economical methods of farming, as well as studying about new developments in farm machinery.

Algebra

Tenth grade students work on Algebra, the branch of mathematics concerned with the relations and properties of numbers by means of letters, signs of operation, and other symbols. Study in this course includes solution of equations, polynomials, and continued fractions.

Art

Dawn Sweigart, Marlene Rentschler, and Stewart Brodman work on still life drawings, one of the many projects undertaken by the art classes. The attractive bulletin board displays in the hall this year were products of the art classes.

Bookkeeping

Carol Hartman explains a bookkeeping problem, which has stumped the other students. Knowledge of bookkeeping is invaluable not only for future men and women of business, but also for each person who wishes to be successful in budgeting his money. Realizing this, students find the classes interesting and worthwhile.

Chemistry

Mr. Hartman looks on as Nancy Bixler and Barry Kraatz perform an experiment on lime water filtration. Becoming familiar with the elements and how they react when combined chemically, students discover many secrets of the universe and gain an understanding of modern science.

Driver Training

Mr. Matthew gives his approving smile as Barry Kraatz names the parts of the engine. James Kintzer listens intently, for his turn is next. These boys, as well as the other juniors in driver training classes, get first-hand experience in driving and car care and learn the basic rules for safety on the highway.

English

The tenth grade students prepare the themes Mrs. Matthew has assigned them. English classes spend a great deal of time writing creatively, for this activity stimulates the imagination and gives students an opportunity to apply what they have learned about effective writing. Reading, speaking, and listening activities are also included in the English program.

German

James Bertram reads "Die Kinder," while the rest of the class follow in their books. Most students find German interesting, since many of their ancestors came from Germany. German classes read many interesting short stories as well as listening to German records and reading the novel "Immensee."

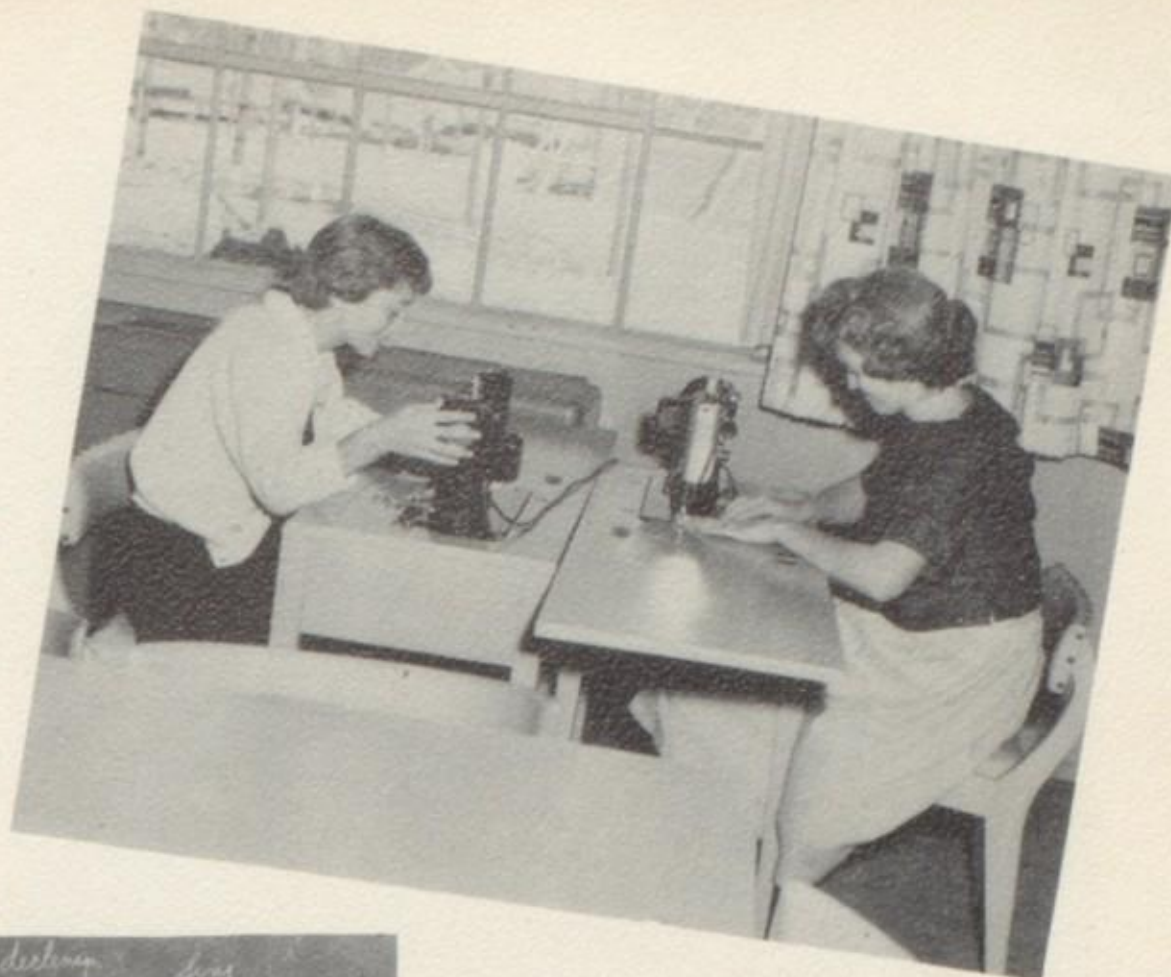

History

Paul Himmelberger, Edwin Meredith, Joan Troutman, and Mary Long make use of reference books in their search for materials to supplement their textbook information about the Ancients. From the facts they gather, students prepare projects which are used as visual aids.

Homemaking

Carol Hartman and Kathryn Burkhardt demonstrate their skill in sewing, which, they have found, has helped to enlarge their wardrobes. Good grooming, cooking, childcare, and home management are just some of the subjects besides sewing taught in homemaking classes.

Latin

Bonnie Luckenbill, Clayton Wagner and Tanya Pyle show David Evans and Evelyn Balthaser how to decline nouns. These students find Latin basic to a colorful vocabulary in English and important in the understanding of world history. At Christmas time the class enjoyed the singing of "Adeste Fideles."

Music

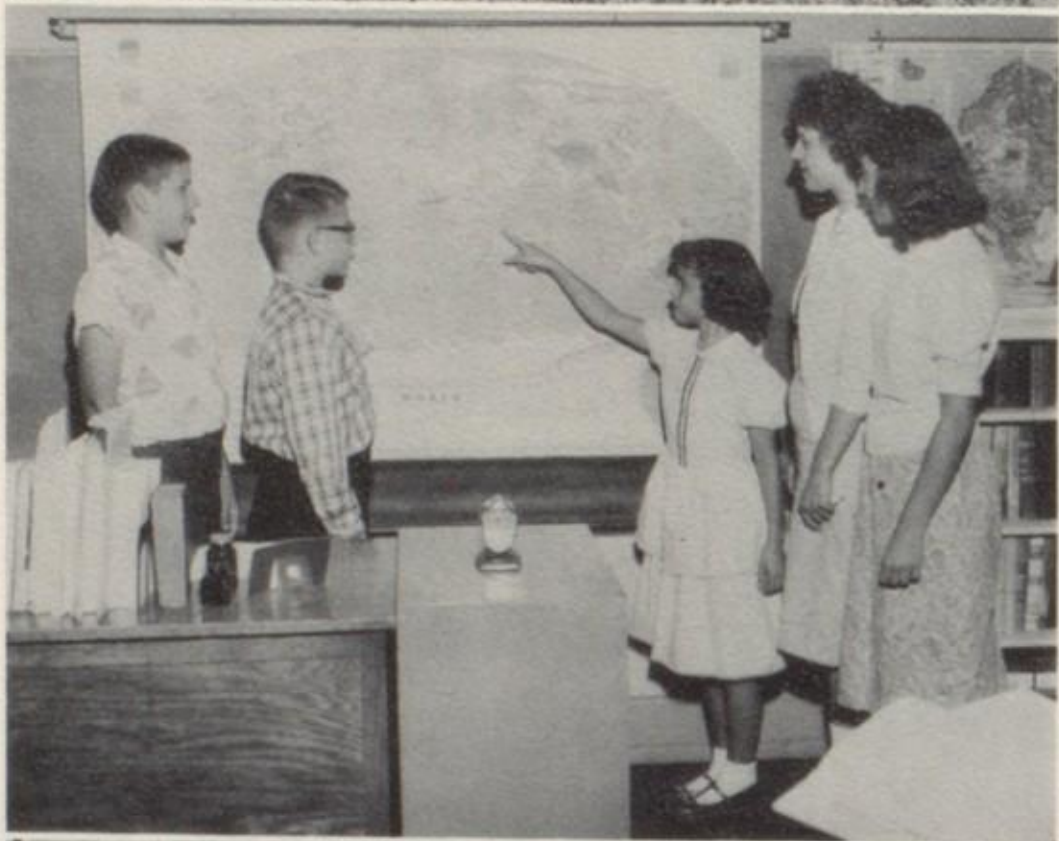

Dale Henne and Richard Wilhelm play a French horn selection with Mr. Berger. Students have regular lessons on band instruments so they may become more proficient musicians. Junior high school classes receive instruction in vocal music, and study the mechanics of, and appreciation for fine music.

Physical Education

The seventh grade physical education class learns the fundamental rules of hockey. While some practice bullying, others practice passing, driving and dribbling. The girls find a hockey scrimmage very tiring, but lots of fun. Many seasonal sports are engaged in during the school term.

Social Studies

Sandra Benzel shows Kenneth Tobias, Byron Bixler, Lillian Bare and Sandra Messner important countries of Africa. The students of the ninth grade class have found studying the geography and history of foreign lands fascinating.

Shop

Bruce Good accompanied by Mr. Sleppy constructs stands on which students of the lower grades will do mechanical drawing. Manual arts classes are prepared for future construction work by becoming adept in the use of the many electrical and hand tools needed for this type work.

Science

Arthur Wolf, Robert Smith, Doris Koch, and Janet Lyons work with the static electric machine, one of the devices used for demonstration in science classes. Under the direction of Mr. Hartman the science class learns fundamentals which will prepare them for further study in this field.

Trigonometry

Richard Speicher and Barbara Ernst solve a right triangle, one of the many problems approached in trigonometry classes. Creating a definite challenge to all senior academic students, this advanced form of mathematics acquaints students with the use of the slide rule and surveying equipment.

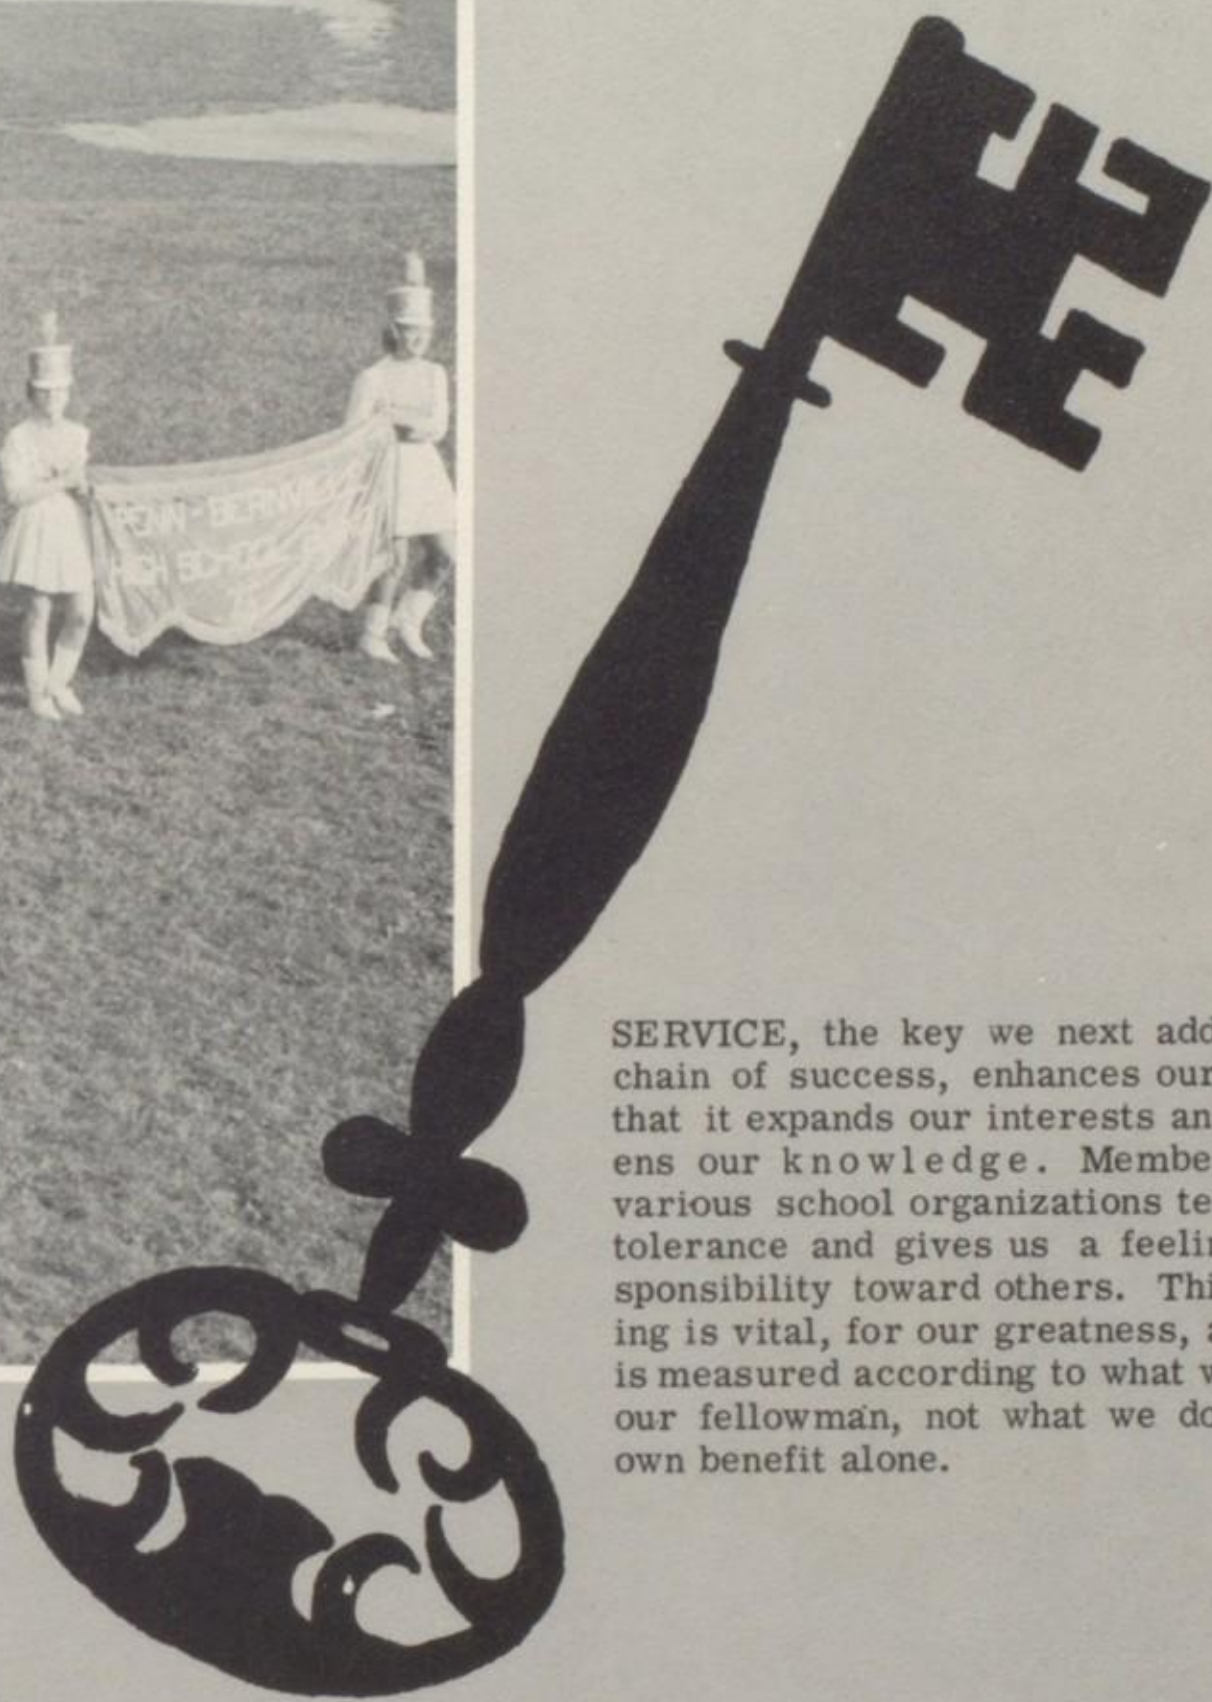

Typing

These juniors are looking at the typing keyboard, trying to memorize the keys on the typewriter. After memorizing the keys, students strive for accuracy. Under Mrs. Mooney's careful guidance, typing students learn proficiency on both standard and electric typewriters.

Organizat

SERVICE, the key we next add to our chain of success, enhances our lives in that it expands our interests and broadens our knowledge. Membership in various school organizations teaches us tolerance and gives us a feeling of responsibility toward others. This learning is vital, for our greatness, after all, is measured according to what we do for our fellowman, not what we do for our own benefit alone.

Council

To start the school term off on a friendly basis, Student Council sponsored a "Get-Acquainted Dance" for grades 7-12. This was only one of the many outstanding activities which were enjoyed by all throughout the year.

One of the Council's projects was sponsoring fine assemblies including Dr. No-Young Park, world lecturer, and a glass blower.

An innovation of Student Council's this year was the presentation of an award to the best decorated homeroom at Christmas time.

Throughout the year this key organization has worked diligently to improve our school.

Pennant

The staff, consisting of the entire senior class, looks on as the co-editors lay out a page in the PENNANT.

Larry Kline and Grace Degler, co-editors, look over the yearbook, checking carefully that everything is in order.

Staff

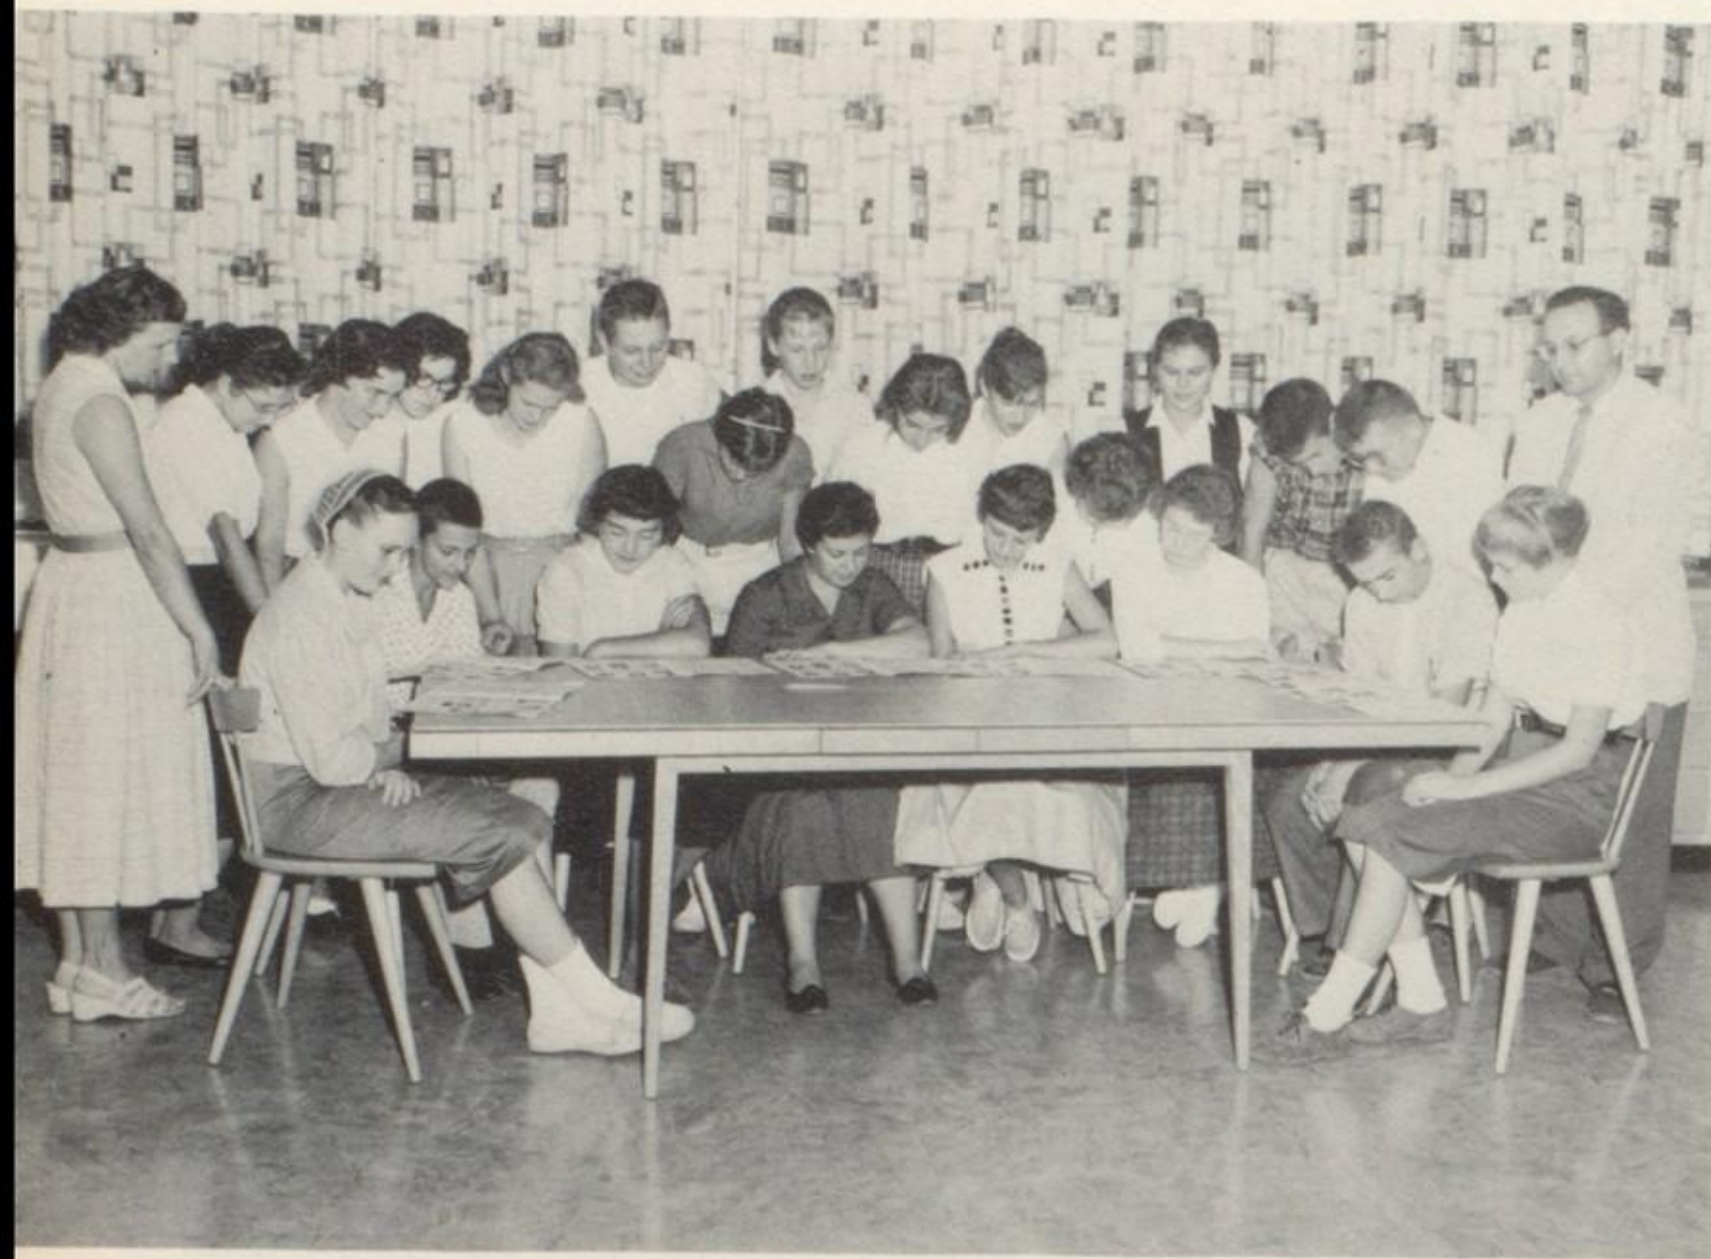

Kenneth Mohn, PENNANT art editor, practices his drawing before starting yearbook artwork. Although he is working by himself on the picture, some of the class artists assisted him so we could meet deadlines.

Stewart Brodman, who is taking a picture of Leslie Weidman and Kathryn Haag, receives instructions on how to operate the camera from Leslie. Since good photography is a "must" for the yearbook, any suggestions for improvement are welcome.

Eileen Tobias, Donna Braithwaite, typing chairman, and Marlene Rentschler work overtime to meet the first deadline. All typing students cooperate to type the many items of copy used throughout the yearbook.

Future Farmers of America

Edmund Yost, Irwin Zerbe, and Bruce Good discuss the effective use of the tractor, one of the implements they use in project work. Boys in the F. F. A. combine actual experience with textbook study, approaching farming from a modern, scientific standpoint. Maintenance and repair of farm equipment is an important part of their education, also, as future farmers.

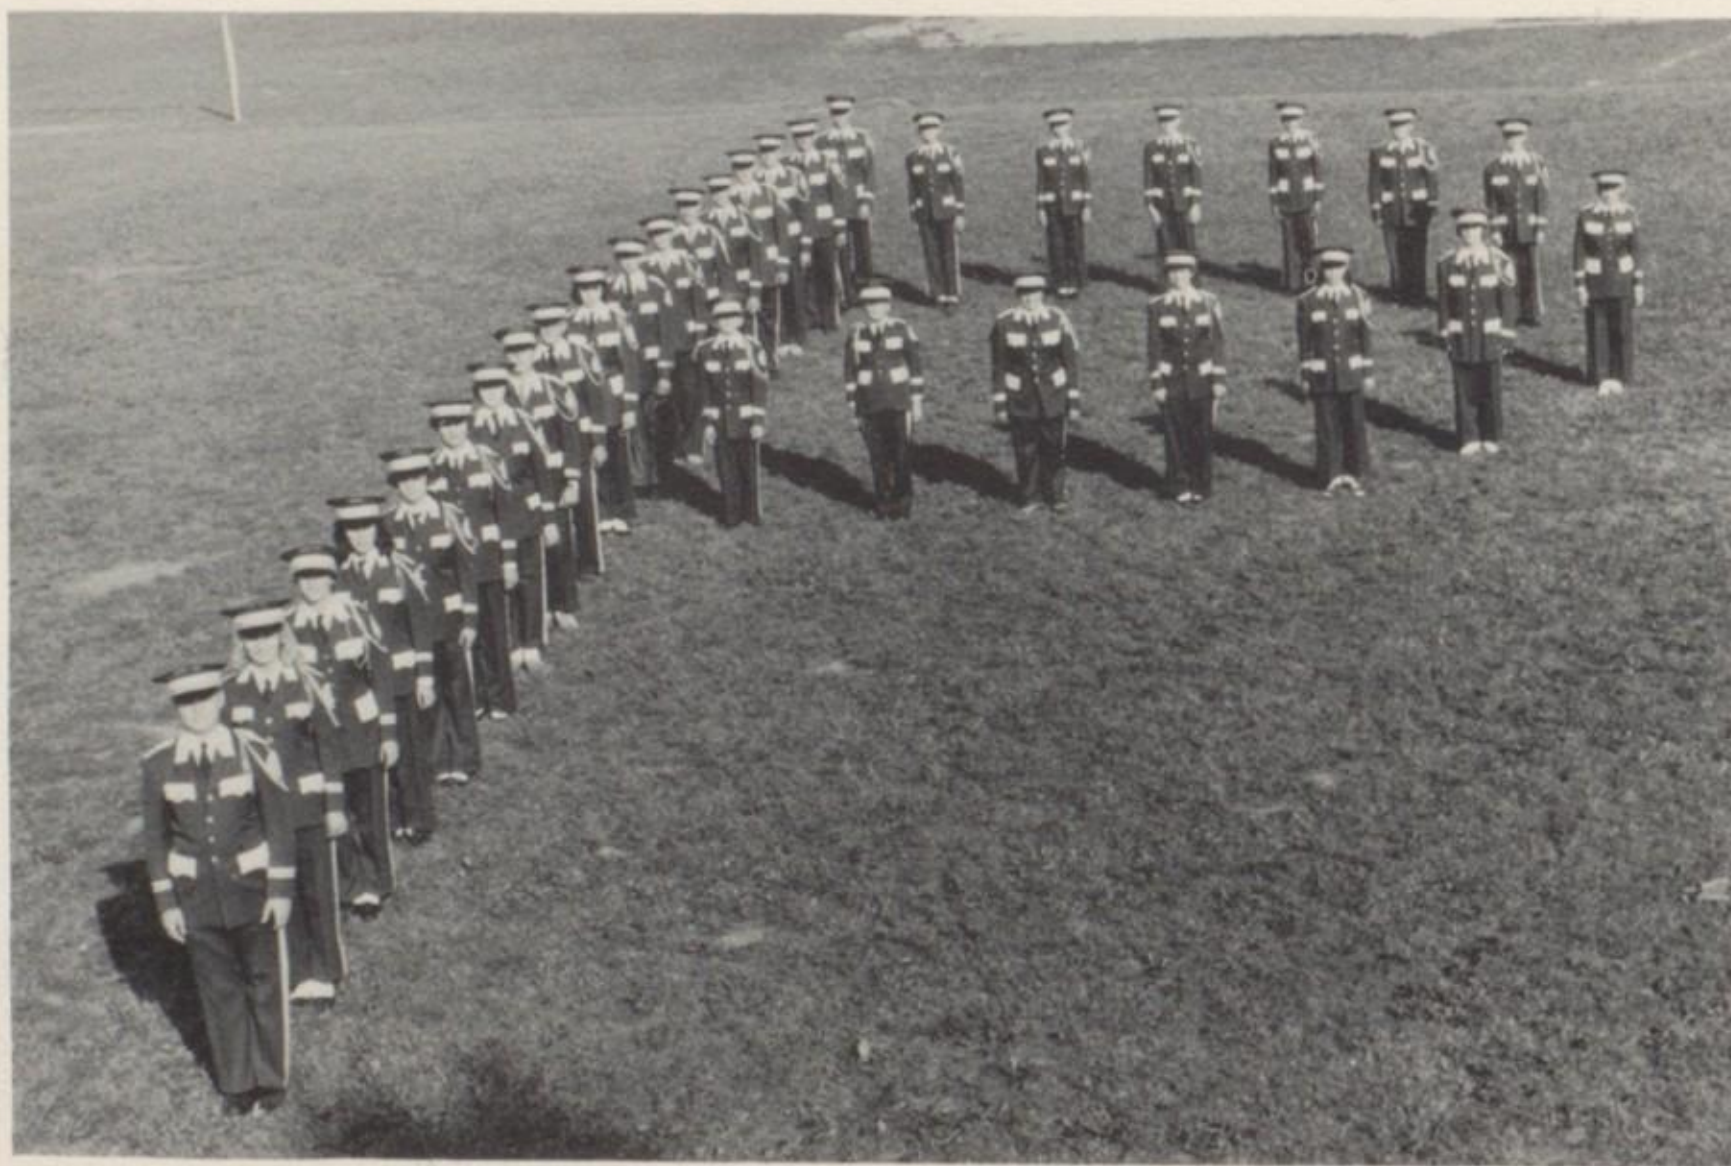

The Penn-Bernville High School Band is one of the most active organizations in the school. In the course of the year it played at the School Directors Conference in November, a portion of the band played various selections at a Christmas concert for the P.T.A., and the entire band presented a spring concert.

Athlet

HEALTH occupies a place of prime importance as a key to success, for, above all else, we must have strong bodies to be able to accomplish our tasks. Our athletic program is designed to provide the physical exercise necessary to keep our bodies in excellent condition so that we may be fit to do the work so essential in becoming a success.

Features

RECREATION is the key to enjoyment of life. Without it, life would seem dull and meaningless. We must study hard and work diligently, but we must set aside time for relaxation if we are to remain happy. Although this is the last key to success we have mentioned in this book, it is by no means a final one. We expect that, as the years pass, we shall be adding many new keys to vitalize the old.

Tenth graders enjoy dancing at their Christmas party.

Dances

and

Diana Kissling and Lester Tobias represent junior and senior high groups at the "Get Acquainted Dance."

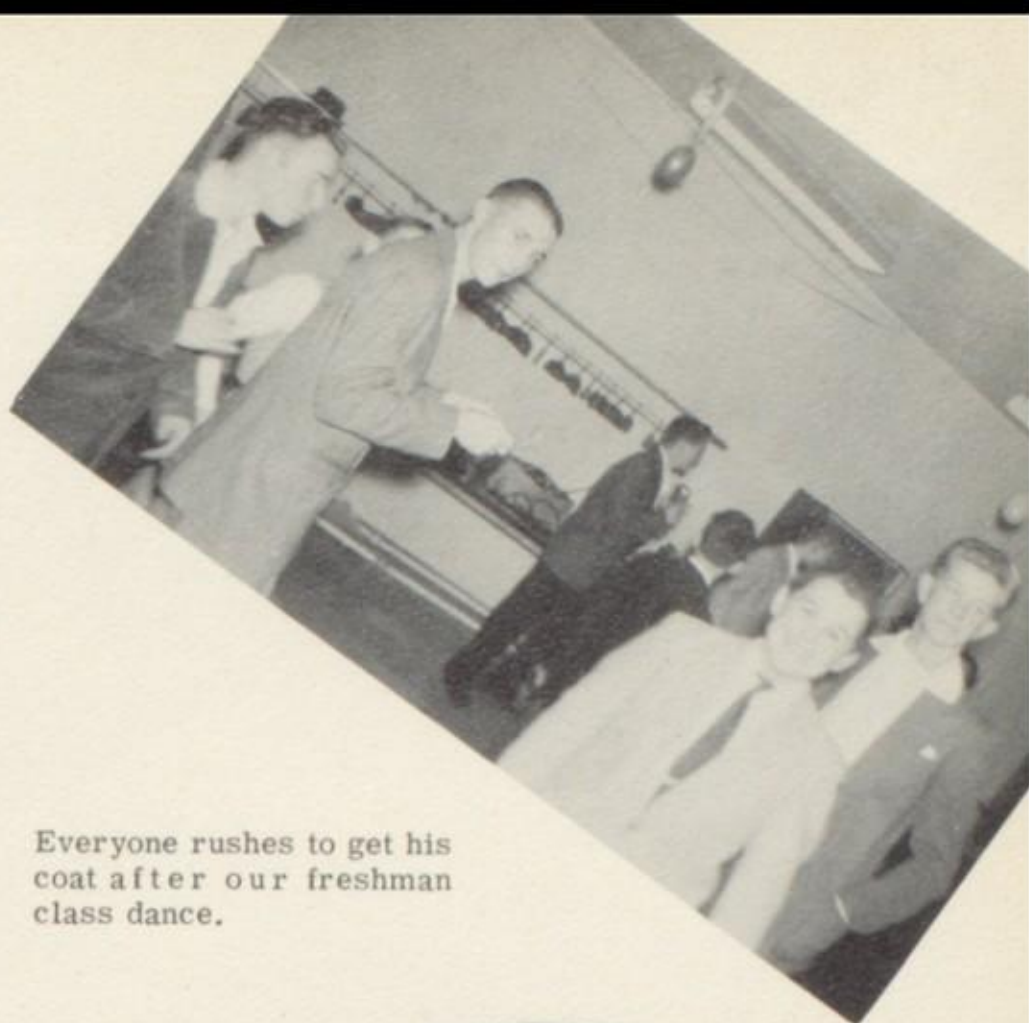

"May I have this dance, Mr. Kaiser?" asks Janet Schlappich at the "Night of Friday the Thirteenth Dance."

Our orchestra fills "Santa's Workshop" with music.

Parties

Everyone rushes to get his coat after our freshman class dance.

Louise Henke, Janet Schlappich, Kathryn Burkhart, and Carol Hartman entertain at their class dance.

Mr. and Mrs. Matthew seem to be enjoying their duties as chaperons.

Junior high students try to win a novelty dance.

1959 May Queen, Miriam Boltz, and her Court watch an afternoon of festive activities.

Larry Kline, Sally Trautman, Kent Steinhauer and Ruth Kirkhoff enjoy the "Paradise of the Deep," the Junior-Senior Prom.

Kathryn Burkhart, Joe Goldstein, Artie Kessling and Louise Henke discuss the latest school news.

"What price glory?" asks Dawn Sewigart, struggling on her term paper.
